Insideout

# Insideout

Access to nature soothes and calms us, a healing support to any healthcare space. With outdoor spaces taking a more prominent role in healthcare facilities, we designed Insideout to provide patients and caregivers with a connection to outdoor areas. It's beautiful, yet durable design work inside as well....as guest seating in exam spaces, learning environments, waiting areas and workplace. As a bonus, the armless solution was designed without metal hardware, making it suitable for MRI spaces, too! Whether offering a place for a guest to accompany patients or providing an outdoor space of respite, this solution supports healing spaces—inside and out.

## Thought starters

Our experienced healthcare team at Carolina works closely along side The OFS Design Studio. This collaboration of dynamic backgrounds and geographic origins among industrial design and engineering teammates brings to life the most patient-centered product solutions the healthcare industry has to offer. Pencil sketches, 3D printed

parts and rough prototypes serve as the journey to fine tune the last 10% so that patients, and the people caring for them can experience the difference between good design and great design. Our goal is to deliver design value in a very intentional way where healthcare products are simple, personal and purposeful.
